

# THE CANLITE

## IGNITION TORCH

\* Fuel tank sold separately.

*Eliminating the use of dangerous rags  
and flammable liquids industry wide.*

With the extended reach and portability of the **Canlite Ignition Torch**, you can eliminate the use of dangerous rags soaked in flammable liquids in all manual ignition scenarios. Ignition occurs within the firetube - away from the surrounding hazardous area, and away from the operator.

## KEY FEATURES

- Heavy-duty piezo electric provides reliable, self-powered operation
- Durable cast aluminum body construction with stainless steel burner tube
- Instant ON/OFF trigger
- Built in regulator valve
- Fully adjustable flame control
- Convenient lock button keeps torch on
- Double safety shutoff valves
- Fully portable
- Uses standard 14 or 16 oz. propane bottle
- Available in standard firetube lengths from 12" to 48", or built to custom fit

*\* Fuel tank sold separately.*
